The compact design of the Rax 19" Wall Mounting Cabinets make them ideal for smaller networks and workgroups.

The cabinets are available in various sizes and are supplied fully assembled. Each cabinet comprises a welded steel frame and adjustable front and rear 19" mounting profiles. The 2-part cabinet has an additional pair of fixed mounting profiles in the rear section.

A gland plate is situated in the top and bottom of the cabinet, with the 2-part cabinet having plates in both the fixed and hinged sections.

The cabinets feature ventilation slots top and bottom; and have a lockable glass front door, and removable sides. The cabinet frameworks are finished in a high quality attractive black.

To make wall mounting easier, the 450 deep cabinets have a removable mounting bracket that may be affixed to the wall before mounting the cabinet, and the 600 deep cabinets have a removable rear section that can be mounted before attaching the main body.
