

# Cable Fault Finder

**TS\* 90** - This easy-to-use, competitively priced tester is three tools in one—a fault locator, a cable and wire manager and a tone generator with SmartTone technology. From just ONE END of any two or more conductor cable you can measure up to 2,500 feet (762 meters). Easily find the distance to opens or shorts on electrical wire, telephone wire, security wire and coax. Results appear as a distance reading rather than a waveform, so it's perfect for technicians unfamiliar with Time Domain Reflectometry (TDR).

Patented SmartTone technology gives you five distinct tones to use for exact wire and pair identification, even in proximity to current-bearing cable.

**TS\* 100** -From just ONE END of any two or more conductor cable you can measure up to 3,000 feet (915 meters). The TS 100 cable fault locator lets you easily find the distance to opens or shorts on electrical wire, telephone wire, security wire and coax. Results appear as a distance reading rather than a waveform, so it's perfect for technicians unfamiliar with Time Domain Reflectometry (TDR).

The TS 100 cable fault locator is perfect for inventory management of cable stock in trucks and warehouses and it can help you generate more accurate bids for jobs by quickly assessing needs and managing the cable stock with greater accuracy.
