| IDC Blocks | Industry standard 4 way IDCs |
| PCB | 1.6mm double sided PTH boards |
| Wiring Specification | Pairs 1, 2 & 3 connected straight through Pair 4 not connected |

Cabinet space is too valuable to have it taken up by stacks of voice panels, which is why Connectix offer a High Density voice panel packing 50 dedicated voice ports into a 1u panel.

Each 8 way RJ45 socket has three pairs connected. This ensures that the panels can be used with analogue, digital and ISDN systems.
